Chapter 11 It’s in our nature
“The bourgeois relations of production are the last antagonistic form of the social process of production — antagonistic not in the sense of individual antagonisms, but of one arising from the social conditions of life of the individuals; at the same time the productive forces developing in the womb of bourgeois society create the material conditions for the solution of that antagonism. This social formation brings, therefore, the prehistory of society to a close.” Preface of A Contribution to the Critique of Political Economy. Karl Marx, www.marxists.org
